

STRATEGIC PLAN – OUTLINE

(Each topic included in the strategic plan will need to have clearly defined actions, who will perform the action(s), a schedule for completing the action(s), and how to measure success or failure of the action.)

- Scientific Basis
 - Epidemiology
 - Limits?
 - New Statistical Tools
 -
 - Biology
 - Cell vs. Tissue vs. Organism
 - Relevance of “New” Concepts – Epigenetics; Adaptive Response; Bystander Effects; ???
 -
 - Models
 - Threshold?
 - Extrapolation from High Doses
 - DDREF
 -
 - Research Needs
 - Coordination/Collaboration
 - Link Molecular Biology & Epidemiology (Possible?)
 -
- Public Trust & Communication
 - Fukushima Dialogues
 -
 - Ethics
 - ICRP Workshops
 -
 - Education
 - Fear
 - Psychology
 -
- Institutional Bias
 - Justification
 -
 - Optimization
 - Concept vs. Application
 - Precautionary Principle
 -

- “Holistic” Safety
 - Threshold
 - Radiological vs. Chemical
 -
- Regulatory Process(es)
